The 1952 livestock development plan was fulfilled in Chitinskaya Oblast; productivity of livestock increased in the oblast during the year.(26)

During the last 5 years, the number of head of livestock tripled in Stalingradskaya Oblast.(5)

During the last years, the number of head of collectivized livestock and their productivity have increased considerably in Ryazanskaya Oblast. However, the 1952 plan for increase in number of head of livestock was not fulfilled in the oblast, and most rayons of the oblast did not cope with their plan assignments for increasing livestock productivity. The failure was due to the fact that sufficient attention has not yet been paid to broadening the fodder base, organization of fodder procurement, and full utilization of rich river-bottom meadows.(27)

By 6 June, sheep shearing was in progress in kolkhozes and sovkhoses of Novosibirskaya Oblast; a high percentage of it was being performed mechanically. Electric shearing units had been received by 119 MTS of the republic and crews trained in their use.(28)

Groznenskaya Oblast had fulfilled the 1953 plan for delivery of wool to the state by 11 June.(27)
